

MEDICAL IMAGING & VASCULAR CENTRE

@ SHN'S GENERAL HOSPITAL

335,000 medical imaging exams performed annually at SHN

65 current age (in years) of existing facilities, preventing proper integration of modern technology

1 interventional radiology suite at SHN currently, leading to significantly longer patient wait times

Medical imaging at General hospital is currently spread across several locations, meaning:

- ACCESS IS DIFFICULT
- PROCESS IS COMPLICATED
- CARE IS INEFFICIENT
- FOLLOW-UP IS HARD
- PRIVACY IS SCARCE

A new **Medical Imaging & Vascular Centre** will bring **5 locations into 1 central hub**

36,000+ square feet

Built at the concourse level of **SHN's General hospital**, the new centre will:

ADD another interventional radiology suite alongside vascular surgery

COMBINE all imaging modalities under a single roof

MOBILIZE state-of-the-art technology

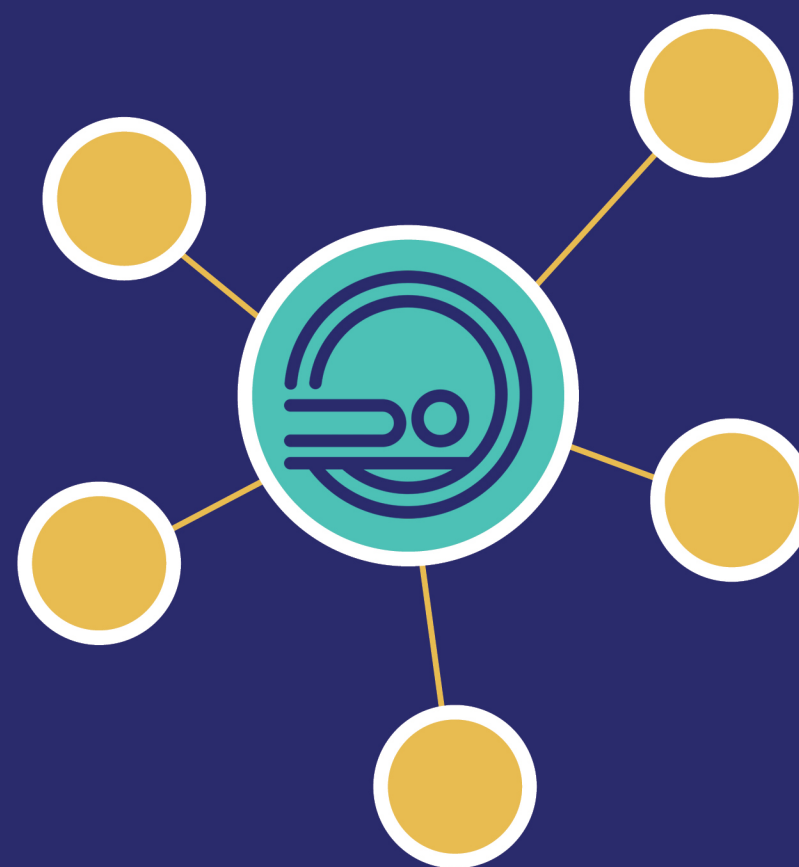

SUPPORT operational efficiency and collaboration

INCREASE patient comfort, privacy and convenience

ENABLE both pre- and post-operative care in a single location

ENHANCE continuity of care with physicians close-at-hand

FOSTER ongoing research and education across teams

The **new centre** will offer patients seamless access to:

- CENTRALIZED REGISTRATION
- INTERVENTIONAL RADIOLOGY
- NUCLEAR MEDICINE
- BREAST IMAGING
- CT SCANS
- MRIs
- ULTRASOUNDS

50%

estimated reduction in wait times achieved with additional interventional radiology suite

The new centre will better serve our nephrology program - **the largest in North America** with

6,000 PATIENTS

IT'S **OUR** TIME
